

Assembling and lining a Method Twenty

Place bag retainer into the base

Push bag retainer down until it clicks into the slots on the sides of the base

Place provided screws into the holes at the back of the bag retainer

Screw in tight

Place the screw covers over the screws

Press down firmly

Assembly complete - you can line your bin

Wrap liner over the edges of the bag retainer

Pull the excess liner to the front and twist together

Tuck twisted liner through the slot and back into the bin

Place the lid on

Place the lid on

The liner will stay in place

and hidden for a sleek finish

Your bin is ready to go

Servicing a Method Twenty

There are two ways to empty your 20L bin

You can use the handle to tip contents into a larger bin to reduce liners used

Or remove and replace the liner as follows

Remove the lid

Remove the liner from the bin

Remove the liner from the bin

Wrap new liner over the edges of the bag retainer

Pull the excess liner to the front and twist together

Tuck twisted liner through the slot and back into the bin

Place the lid on

The liner will stay in place

and hidden for a sleek finish

Your bin is ready to go

Assembling and lining a Method Sixty
