**Are you ready for
FOGO?**

FOGO is rolling out across Australia, and NSW is leading the charge

WASTE IS COSTLY, FROM DIFFERENT ANGLES

22M tonnes

landfilled in Australia last year ,
34% of all waste generated

Source: [National Waste and Resource Recovery Report 2024](#)

97%

of waste management emissions
come from landfill methane

Source: [National Waste and Resource Recovery Report 2024](#)

\$92k → \$37k

what better separation saves a
1,000-person office annually

Source: Method on-site waste audit - Tertiary Campus

The Australian system pays twice:
Once to collect waste it and once to landfill it.

FOGO - WHERE AUSTRALIA STANDS

Urgency

Now Moving Ahead

Western Australia

Residential collections underway in 2025. More improvements to be made by 2030

South Australia

Education + composting focus

New South Wales

Mandate passed - July 2026

Victoria

Landfill levies up July 2025

Queensland

GROW FOGO fund active to 2027

Australian Capital Territory

Pilot expanding, full rollout delayed

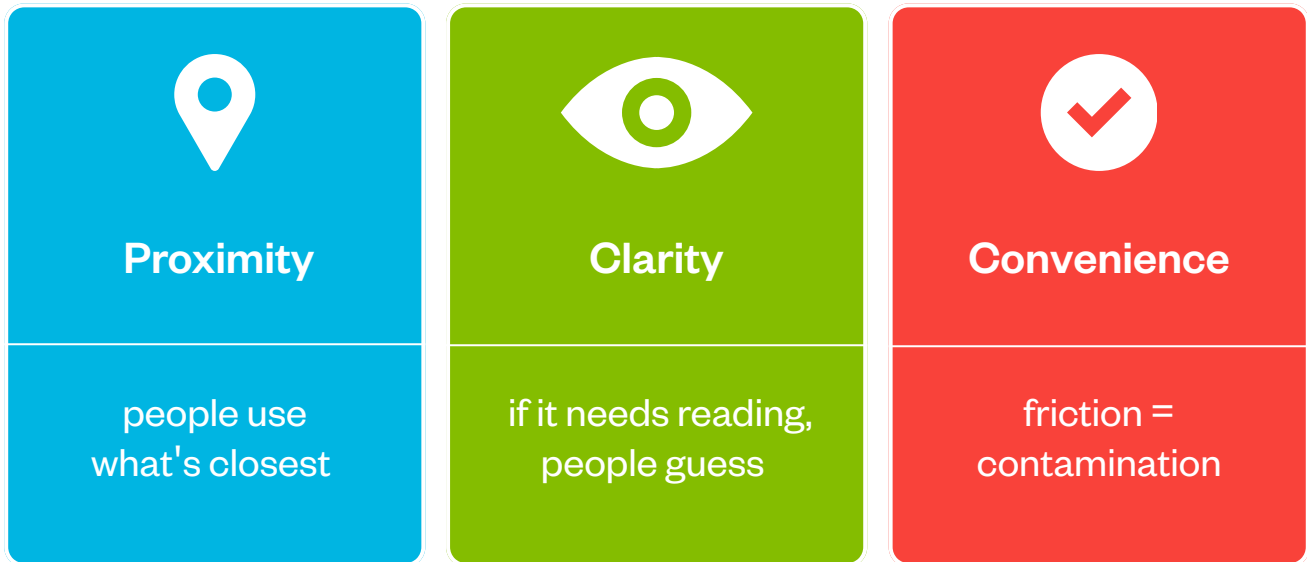

Tasmania

FOGO since 2019 in Hobart

NSW fines for non-compliance:
up to \$500,000

WHAT HINDERS SUCCESSFUL RECYCLING

The wrong choice is always easier than the right one.

It's not a downstream sorting problem. It's an upstream design problem.

Award-winning bins designed to make the right choice obvious.

Up to 84% landfill diversion
Microsoft AU/NZ

\$22k savings/year
Australian National Maritime Museum

See how the numbers work for your organisation:

Method's office scenario for an office with 1000 employees

Landfill-only disposal costs

\$92,000

per year

with Method system

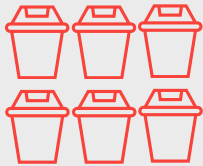

\$37,093

per year

↓ **59.7% reduction!**

Replacing

56

desk bins

with 4 central stations

can save:

\$2,160

a year in liners

\$3,200

or 72 hours of cleaner time

deliver a:

50%

reduction in waste bills.

Compliance is the floor, but **performance** is the goal.
