Venice

Venice Token (VVV) Fact Sheet

1. Token Overview

Name: VENICE Token

Ticker Symbol: VVV

Blockchain: Base

Token Type: Utility

Launch Date: 01/27/2025

Contract Address: 0xacfE6019Ed1A7Dc6f7B508C02d1b04ec88cC21bf

Staking Address: 0x321b7ff75154472B18EDb199033fF4D116F340Ff

Oracle Address: 0x9c4de891e14ffb39d5972814ee6cf60936c7da39

Airdrop Burn: 0xf5a19b79b13274faf19c46b404a36699990cad18e907aece0ab26671ff4a37af

2. Key Features

Utility: Staking for access to free, ongoing AI inference on the Venice API

Unique Selling Points (USPs):

- Private and Uncensored Inference: eliminates surveillance and censorship risks associated with traditional AI APIs
- Zero-Marginal Cost: Eliminates per-request fees for inference, enabling more scalable and cost-effective AI development
- Staking Yield: Provides passive income for token holders through emissions-based yield

3. Tokenomics

Genesis supply: 100 million VVV

14 million emitted per year

50 million (50%) airdropped to Venice users and crypto x AI community

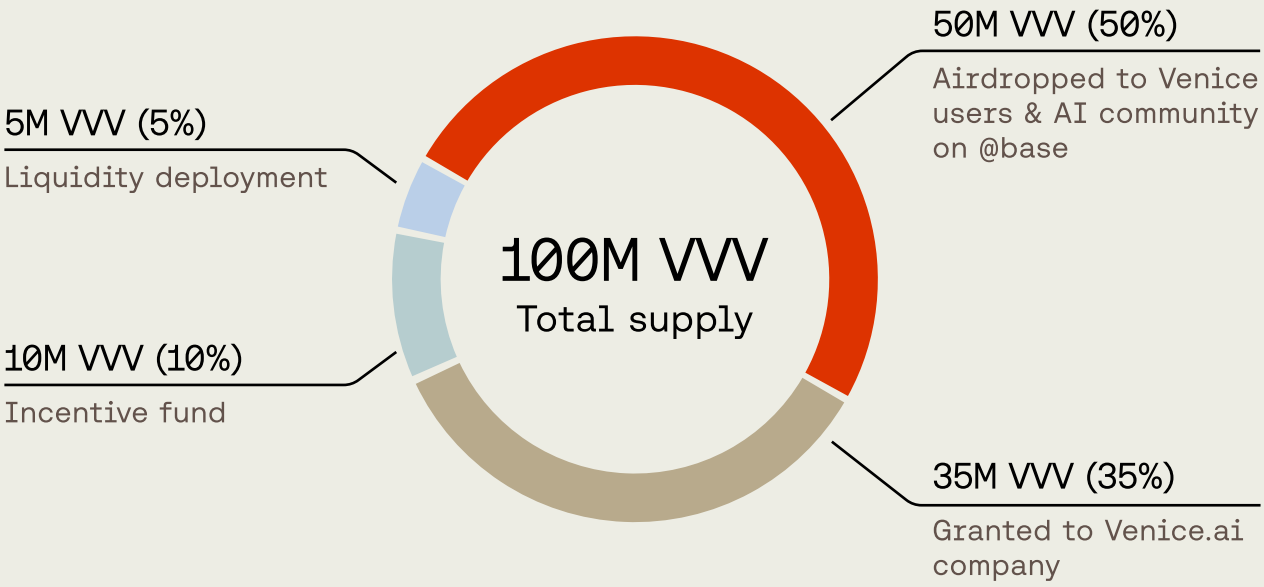

35 million (35%) granted to Venice.ai

10 million (10%) granted to Team, 1/4 unlocked upfront and remainder streaming over 24 months.

10 million (10%) Community Incentive Fund

5 million (5%) Liquidity Fund

TGE token distribution

4. Security

Audit Completed By: Trust Security: trust-security.xyz/trust-security-audits

5. Use Cases

Primary Applications:

- Private and Uncensored Inference: High-scale on-demand inference for free, that is not read or stored by any company, with no content restrictions.
- Generative AI Applications: Support a wide range of AI applications, including text, image, and code generation, through the Venice API
- Cost-Effective Inference: Reduce economic friction and increase scalability for AI agents and developers by accessing inference without paying per request
- Staking and Yield Generation: Earn emissions-based yield by staking VVV tokens and contributing to the Venice ecosystem

Target Audience:

- AI Agents: Autonomous entities that require inference capacity for their operations
- Developers: Individuals and teams building AI applications and services with the Venice API

6. Market Information

Exchanges: Aerodrome Coinbase Kraken ByBit Kucoin Gate.io Uniswap

Market Data: CoinMarketCap CoinGecko CoinCap

Block Explorer: Basescan
